

75 Flights to Australia, Africa & Asia and a SAFE return - Cross Country's of a LIFE Time

Learn from experiences as a ferry pilot; prepare for the unexpected. Detailed flight planning and a watchful eye on the gauges gives you the edge if something changes, even if you aren't going to Australia.

It's 7000 nautical miles from Oakland, California to Sydney, Australia and almost all of it is over water. Knowing your aircraft systems is key when the closest airport is 1000 miles of ocean away. Fuel management tops the list with the electrical system not far behind.
